

World Lupus Federation Twitter Poll Results

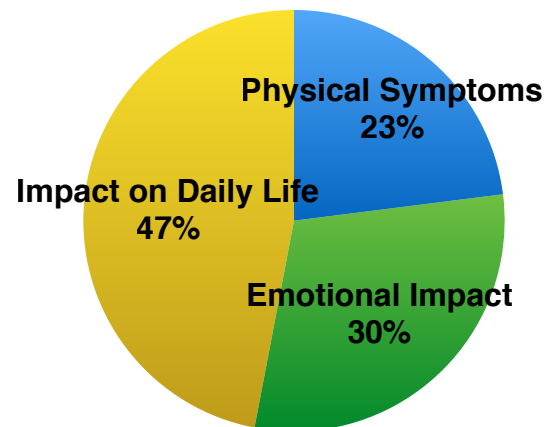

April 2017

The Twitter poll was conducted by 12 lupus patient groups in nine countries, with a total of 2,048 votes cast.

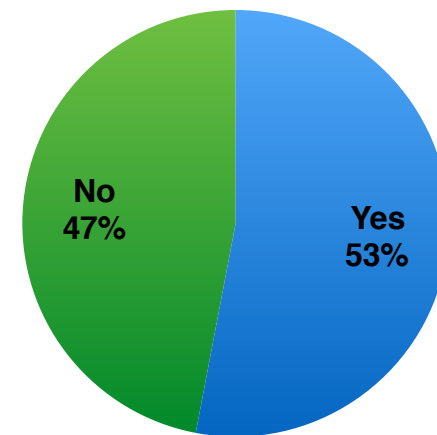

What worries you most with lupus?

Which aspects of your lupus do you feel are most misunderstood by your doctor?

Are you satisfied with the management & treatment options available to you through your doctor?

Although a social media poll provides valuable insights, it is not statistically significant or demographically representative.
